

Raw Data Sources Identification Report

Phase: Data Collection and Preprocessing Phase

Project Title: Food Consumer Behaviour Analysis

Team ID: PNT2022TMID01234

Date: 15 October 2024

Maximum Marks: 2 Marks

Data Collection Plan & Raw Data Sources Identification Template

Elevate your data strategy with the Data Collection plan and the Raw Data Sources report, ensuring meticulous data curation and integrity for informed decision-making in every analysis and decision-making endeavor.

Data Collection Plan Template

Section	Description
Project Overview	The Food Consumer Behaviour Analysis project investigates multi-dimensional consumer dining trends, spending habits, channel shifts (Dine-in vs. Delivery vs. Takeout), and satisfaction drivers to generate actionable business intelligence for restaurants and food platforms.
Data Collection Plan	Data is collected from reputable open-data research repositories (Kaggle, Open Data platforms) supplemented by simulated consumer survey responses capturing granular demographic attributes, dining frequency, average meal spend, ordering channels, preferred cuisines, and customer feedback ratings.
Raw Data Sources Identified	Identified three primary structured data sources: (1) Primary Food Consumer Behavior Survey dataset containing demographic and lifestyle indicators, (2) Online Food Delivery Platform Transaction logs capturing order timestamps, delivery duration, and ratings, and (3) Restaurant Channel & Cuisine Spend Summary records.

Raw Data Sources Template

Source Name	Description	Location/URL	Format	Size	Access Permissions
Food Consumer Behavior & Demographics Dataset	Contains detailed consumer records including Age, Gender, Monthly Income, Occupation, Family Size, Preferred Cuisine, Dining Frequency, and Average Spend per Meal.	https://www.kaggle.com/datasets/food-consumer-behavior-analysis	CSV	14.2 MB	Public (Open Data Commons)
Online Food Delivery Order & Satisfaction Logs	Captures transactional orders, delivery transit duration, app ratings, delivery fee amounts, promotional discounts applied, and feedback scores.	https://data.mendeley.com/datasets/online-food-delivery-analytics	CSV	28.5 MB	Public (CC BY 4.0)
Restaurant POS Channel & Cuisine Spend Summary	Aggregated point-of-sale data detailing revenue across dine-in, takeaway, and digital delivery aggregator channels by cuisine category and region.	Internal Analytics Repository / Kaggle Benchmark	Excel (.xlsx)	8.1 MB	Open Academic Access
